# Jyotish Reading Roadmap

The exact order to read 400+ books - from absolute zero

**1. Foundations - Panchanga and the Rashis**

The sky's clock, and the 12 signs. If you cannot read a Panchanga, you are not ready to predict anything yet.

**2. Grahas - the 9 planets**

What each planet actually signifies, and why the friendships between them work the way they do.

**3. Bhavas - the 12 houses**

How a planet actually behaves in each house, and how to read a chart instead of memorising cookbook meanings.

**4. Nakshatras - the 27 lunar mansions**

The birth nakshatra, its deity, and what it changes about a chart.

**5. Dasha and Gochar - timing**

Vimshottari dasha and transits. This is where predictions actually begin - and it only works if steps 1 to 4 are solid.

**6. Dosh, Yog and remedies - LAST**

Manglik, Kaal Sarp, Sade Sati, Laal Kitaab, gemstones. Remedies come after understanding, not before. A stone prescribed before you can read the chart is a guess.

**Alongside: read the granths in easy language first**

Brihat Parashar Hora Shastra, Phaladeepika Sar and Saravali Gyaan in Hinglish - before the full classical texts.

## Start here - read these 5 first
